2-: HAZARDS-IDENTIFICATION

Potential health effects from overexposure:

Routes of exposure: skin contact, eye contact, inhalation (Dust).
Minimal respiratory tract irritation may occur as with large amounts of any non- toxic dust. Thermal decomposition will evolve toxic and irritant vapors.

Combustion products: See Section: 10.

Potential Health Effects:

Special Hazards:

EU Classification: Australia Classification:

Routes of exposure:
skin contact, eye contact, inhalation (Dust).

Inhalation (Dust). For large quantities:
May cause irritation to the respiratory system.
Effects and Symptoms - Increased difficulty in breathing. Sneezing. Coughing. Use this product as intended in order to prevent the dust leakage that leads to exposure.

Skin Contact:
No specific effects and/or symptoms have been reported or known.

Eye Contact:
May cause eye irritation. Use this product as intended in order to prevent the dust leakage that leads to exposure.

Ingestion:
May cause stomach ache. Unlikely route of exposure. May form explosible dust clouds in air.
Not classified as hazardous according to EU Directive 1999/45/EC. Not classified as hazardous according to the criteria of NOHSC.

4. FIRST AID MEASURES

General: If symptoms persist, obtain medical attention.

Inhalation: Obtain immediate medical attention. In case of accident by inhalation remove casualty to fresh air and keep at rest.

Skin Contact: Remove contaminated clothing immediately and wash affected skin with plenty of water or soap and water.

Eye Contact: Obtain medical attention. If substance has got into the eyes, immediately wash out with plenty of water for at least 15 minutes.

Ingestion: Obtain immediate medical attention. Wash out mouth with water and give 200- 300 ml (half a pint) of water to drink.

5. FIRE-FIGHTING MEASURES

Extinguishing Media:

Unsuitable Extinguishing Media:

Extinguish preferably with dry chemical, Water spray, Foam. Do not use water jet.

at your side

Special firefighting procedures:

Do not use high-pressure water in order to prevent creating a dust cloud and spreading fire dust. Use appropriate respirator for carbon monoxide and carbon dioxide. Wear positive pressure self-contained breathing apparatus (SCBA) during the attack phase of firefighting operations and during cleanup in enclosed or poorly ventilated areas immediately after a fire. Personnel not having suitable respiratory protection must leave the area to prevent significant exposure to toxic combustion gases from any source.

Unusual fire and explosion hazards:

May form explosible dust clouds in air. Combustion products: See Section: 10.

Explosion limits: No data.

6. ACCIDENTAL RELEASE MEASURES

Personal Protection:

Avoid generation of dust. Do not breathe dust.

A suitable dust mask or dust respirator with filter type NP may be appropriate.

Environmental Precautions:

Prevent substance entering sewers. Washings must be prevented from entering surface water drains.

Methods for Cleaning Up:

Sweep the spilt toner or remove it with a vacuum cleaner and transfer into a sealed container carefully. Sweep slowly to minimize generation of dust during clean-up. If a vacuum cleaner is used, the motor must be rated as dust explosion- proof.

Potential for very fine particles to be taken into the vacuum only to be passed back into the environment due to pore size in the bag or filter.

DISPOSAL CONSIDERATIONS - See Section: 13.
